

Make Your Own Air Purifier for Around \$35

Take a 20 inch box fan (\$18)

Attach a 20x20 inch air filter with tape or big rubber bands

MERV 6 MPR 300	lint	household dust	pollen							
MERV 8 MPR 600	lint	household dust	pollen	dust mites debris	mold spores					
MERV 11 MPR 1000	lint	household dust	pollen	dust mites debris	mold spores	pet dander	smoke	smog	cough/sneeze	
MERV 13 MPR 1900	lint	household dust	pollen	dust mites debris	mold spores	pet dander	smoke	smog	cough/sneeze	bacteria virus carriers

The filter package will say what it filters. The higher the number, the better the filter.

Turn the fan on and leave it running. It is filtering all the air that blows through it. Change the filter when it gets dirty.
